

WiFi IP Spy Camera with Audio and Smartphone Mobile Viewing (Model: SMART-I)

The ultimate accessory for your Smartphone or Tablet, the Smart-I is a high resolution Colour Camera that is smaller than a golf ball and runs on batteries for portable use. The camera is suitable for use as a spy camera, security camera or just for having fun.

It operates without wires, transmitting live video and audio directly to a Windows PC, Mac, iPhone, iPad or Android device. You can even add it to your existing WiFi network and view the camera from across the world via the internet.

The footage can be viewed and recorded on to PC/Mac using a web browser or on to an iPhone, iPad or Android device using the optional Smart-I AV Recorder app. For permanent power an accessory pack is available which allows the Smart-I to be powered by the mains or a cigarette lighter socket.

Camera - Front

Camera - Side

Camera - Rear

Specifications
