

Heavy Duty Internal Vehicle Camera with 10m IR Night Vision, 130° Wide Angle Lens Switchable Mirror View and Audio (Model: SVA020)

The SVA020 is a heavy duty vehicle CCTV camera with 10m infrared night vision for viewing in complete darkness.

The camera is designed for Internal use in all types of vehicles, and has a built in microphone for crystal clear audio.

The camera can produce both standard and reversed (mirror) images.

The 130° wide angle lens and heavy duty design, make it ideal for use in commercial environments as a:

- Driver Facing Camera
- Interior Facing Camera
- Passenger Facing Camera

Camera - Front

Camera - Side

Camera - Back

Camera - Location

Features

- The camera features a class leading Xvision Pixel+ lens for producing 130° wide angle images
- Latest sony CCD imaging sensor for clearer images, day or night
- Up to 5m infrared night vision for viewing in complete darkness
- Can output standard or reversed (mirror) images - reversed images are required when the camera is rear facing and connected to a monitor or recorder that does not change the orientation of rear facing cameras - This function is not needed when using Smart Witness monitors and recorders, as all models are able to change the orientation of cameras images.
- The camera is available in 2 versions:

SVA020:

This version has a 5m cable (optional extensions leads available) that terminates in a BNC socket (for video output), phono socket (for audio output) and a DC socket (for power input)

SVA020-W:

This version is supplied with a wireless transmitter and receiver. The camera plugs in to the transmitter unit and the receiver unit plugs in to a monitor or recorder. The maximum distance between the transmitter and receiver is 30m line of sight. The transmission signal type is digital so the picture is completely interference free.

- 2 Year Worldwide Warranty
