

Mini Internal/External Vehicle Camera with 10m IR Night Vision, Tamper Resistant Design and Wide Angle Lens (Model: SVA025)

A compact camera designed for internal or external use in all types of vehicles.

The camera has 10 metres of infrared night vision for viewing in complete darkness.

The camera is Tamper Resistant.

The 120° Wide Angle Lens and miniature size make it ideal for discreet use as a:

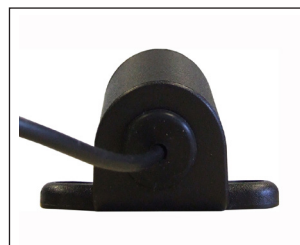

- Forward Facing Accident Camera (mount outside the vehicle)
- Driver Facing Camera
- Interior Facing Camera
- Passenger Facing Camera
- Side View Camera (mount outside the vehicle)
- Reversing Camera (mount outside the vehicle)

Camera - Front

Camera - Side

Camera - Back

Camera - Location

Features

- The camera features a class leading Xvision Pixel+ lens for producing 120° wide angle images
- Latest high resolution imaging sensor for clearer images, day or night
- Up to 10m IR night vision for viewing in complete darkness
- Tamper resistant design
- Designed for external use, the camera is waterproof to IP68 standards, allowing it to be used in all weather conditions

The camera is available in 3 versions:

SVA025:

This version has a 5m cable (optional extensions leads available) that terminates in a phono socket (for video output) and a red and black cable (for power input)

SVA025-S:

This version is supplied with 5m (optional extension leads available) plug & play cable, and connects directly to the SVC400E or SVC400GPS recorders. The camera receives power directly from the recorder, and both power and video are carried through the same discreet cable, for extra convenience and superior reliability.

SVA025-W:

This version is supplied with a wireless transmitter and receiver. The camera plugs in to the transmitter unit and the receiver unit plugs in to a monitor or recorder. The maximum distance between the transmitter and receiver is 30m line of sight. The transmission signal type is digital so the picture is completely interference free.

2 Year Worldwide Warranty
