

Professional 19" LED CCTV Monitor with HDMI and VGA Inputs, and 3D Noise Filter (Model: X19LED)

The X19LED is designed for demanding CCTV and broadcast applications and provides a stunning picture quality with a resolution of 1366x768 pixels. Additionally, the Monitor is packed with great features whilst using far less energy than equivalent LCD models.

The LED display panel used in the X19LED offers ultra fast response times and the highest brightness and contrast ratios in its class, ensuring that blacks, greys, whites and colour are both natural and full of depth.

The X19LED is equipped with a HDMI connection for a clearer picture as well as a BNC, Phono and VGA connection. The monitor is also fully VESA compliant for versatile fitting and is designed for indoor use in both domestic and commercial premises.
