

Full HD 16 Camera NVR with USB Back Up, HDMI Output, Networking, 3G Mobile Phone Viewing, USB Mouse Support and IR Remote Control (Model: X400R)

The X400R is a high quality, economical 4 channel NVR and can record in any resolution from D1 (standard CCTV) to Full HD (HD CCTV). The NVR is equipped with 2 powerful processors to ensure high performance and super fast remote viewing, allowing it to record D1 cameras in real time, 720P cameras at up to 200fps and 1080P cameras at 100fps.

The X400R has up to 6TB of internal recording capacity and offers quick and easy backing up via its built in USB port, which can be connected to a USB Hard Drive or USB Memory Stick. Additionally, it has VGA and High Definition HDMI outputs where the display output is a True 1080P – utilising the full resolution available on HD monitors.

The iPhone/iPad and Android apps available for use with the NVR support advanced functionality, allowing you to view cameras, playback, configure the DVR, and receive PUSH VIDEO. This means the DVR will alert you when it detects movement, when you receive the alert on your phone, you simply press one button and the app will start playing back the recording that triggered the alert. Additionally, the NVR can also be viewed from a Windows PC, this allows viewing of multiple DVRs and playback and backing up of recordings too.
