

Professional 4 Camera DVR with USB Back Up, DVD Back Up (Optional), Networking, 3G Mobile Phone Viewing, IR Remote Control & USB Mouse Support (Model: X4D1)

Xvision have combined top of the range features, an easy to use interface and Full D1 recording in Real Time in to a great value high quality DVR with the most advanced mobile/tablet support in the industry. The DVR is ideal for those looking for the best recording solution for home use or a good quality DVR for business use, it can record up to 4 cameras.

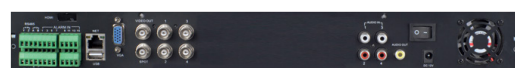

The X4D1 records digitally in Full D1 high resolution using the very latest H264 compression technology in real time on every channel. The DVR can be accessed remotely from a Windows PC , Mac, iPhone, iPad, Android, Blackberry, Windows Mobile or Symbian (Nokia etc) device. Using the optional advanced iPad app it is also possible to hide the DVR away and control every function of the DVR viewing the cameras and backing up from the iPad.

The H264 compression codec used provides the highest picture quality and most efficient use of recording space, allowing a 500GB hard drive (not supplied) to record for approximately 4 days at D1 resolution in real time on every channel, to a maximum of up to 2 months at a low frame rate and in low resolution. Using the built in motion detection function the recording time above could be increased substantially, as the unit will only record when the cameras see movement.

The DVR also features a professional OSD control interface which can be used in combination with a mouse for simple control of all functions.

DVR - Front

DVR - Rear

Specifications

Model: X4D1
