

Professional 2.5" Mini LCD CCTV Test Monitor with Adjustable Wrist /Belt Strap (Model: XTM010)

The XTM010 is a handy, lightweight and portable mini CCTV monitor designed to be used as a test monitor to view camera positions before they are fixed during installation.

The unit is designed to be strapped to your wrist or ladders for complete hand free use. This allows an installation to be more safer and efficient, as there is no need to return to the main monitor in the building, saving both time and money.

The XTM010 is supplied with a rechargeable battery and power supply, for up to 6 hours battery life and 20 days standby when not in use. Additionally, the unit can be desk mounted using the removable bracket or for portable viewing it can be worn on users wrist.
