NOTE: Limitation of the event file number

The total number of recorded files must be less than 3,000.

If the Drive Recorder records more than 3,000 files, there is a possibility that the booting time will be longer than 1 minute. Therefore, the number of files are limited to a maximum of 3,000.

As a result, the maximum recording time is 500hours, regardless of SD card size.(3,000 files x 10 min = 10,000 min = 500 hours).
