

## SVC100SEC Locking Cover

Installing the locking cover for SVC100GPS & SVC150GPS

The SVC100SEC & SVC100SEC-T locking cover is for use with the SVC100GPS and SVC150GPS series vehicle journey recorders. Its purpose is to prevent tampering or removal of the SD card by anyone without a key.

### How to assemble

1. Use super glue to stick the end block to the SD slot side of the unit. Use the guide lines to align the end block with the unit.
2. Wait for the glue to completely dry before attaching and locking the cover.

The two guide flanges should fit into the slot.

3. Place the locking cover over the end block and use the key to lock the cover and end block together.
