

Firmware upgrade on X4/8/16D

Please follow the steps to upgrade the DVR firmware via USB Memory Stick

Step 1:

Download the relevant firmware from attachment or from <http://factory.y3k.com/>

Step 2:

Extract the SDVRx11-1.0.3b87-Y3K.fw file and copy it to the ROOT of your Memory Stick.

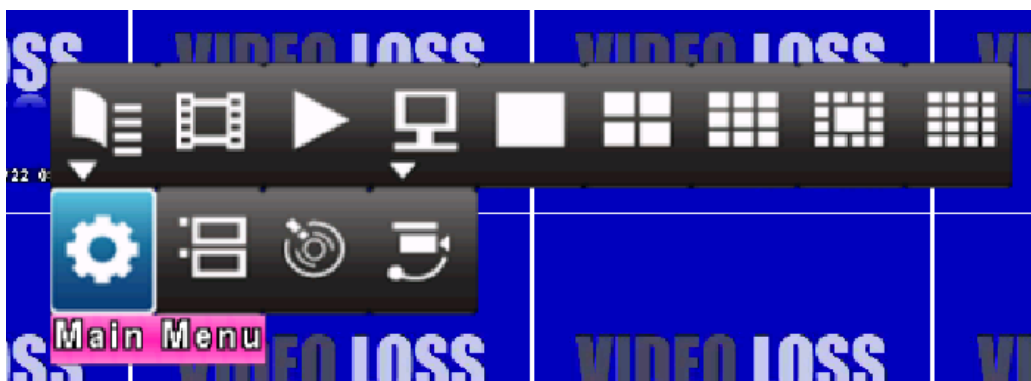

(You will need an application to open any software downloaded from the factory site. Install Winrar to extract downloaded files. Please note all software is Windows based unless specified)

Step 3:

Insert the USB Memory Stick into the DVR.

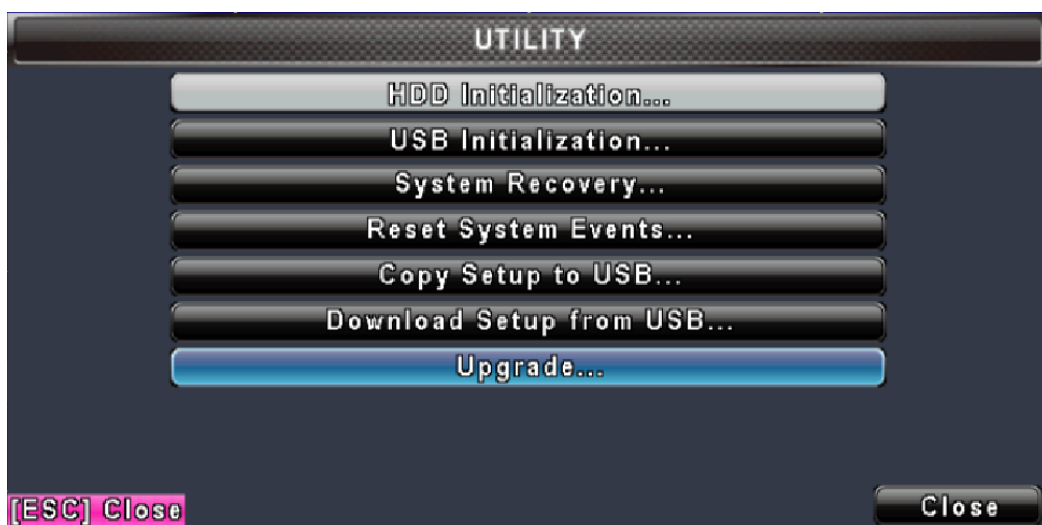

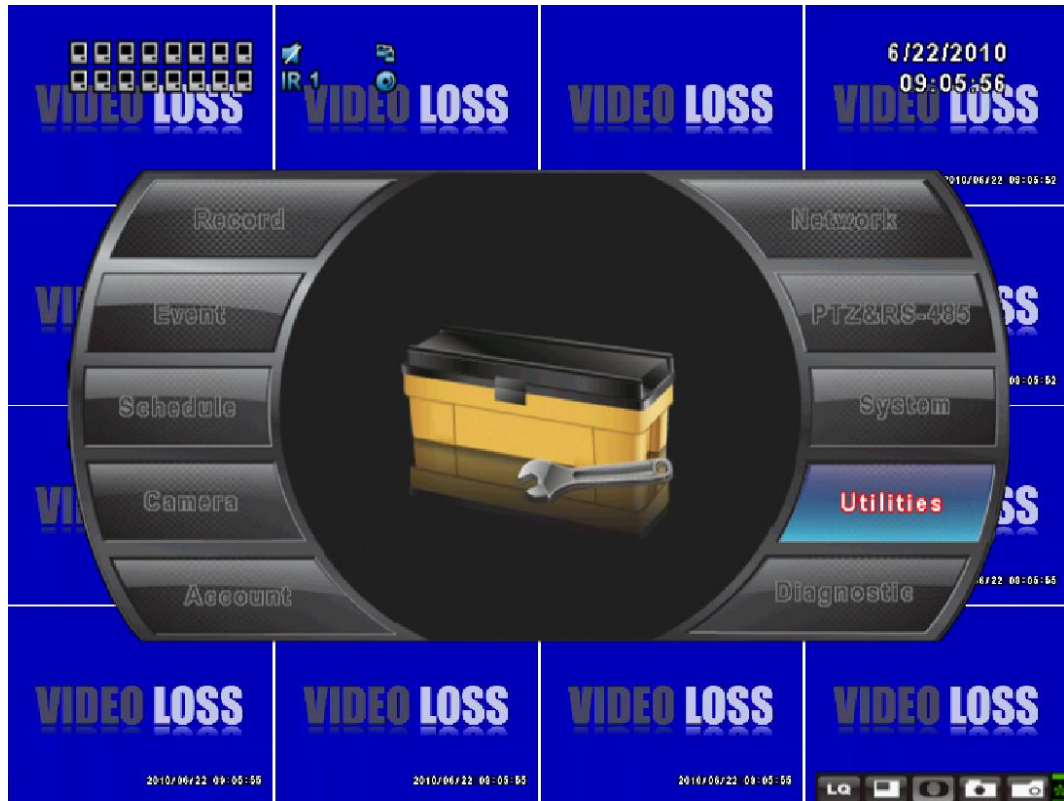

Step 4:

Press the Menu button and go to Setup>Main Menu.

Step 5:

Go to Utilities>Upgrade

Step 6:

Select the firmware and then press ENTER.

Step 7:

Change the value to YES and press ENTER, the unit will reboot once the firmware update is complete.

Please visit <http://factory.y3k.com/Files/Software/wrar36b2.exe> for Winrar.

(This program is needed to extract downloaded software files)
