Adjusts the brightness level of the CRT screen.

6. Installation- Notes

Use the following points to help you complete a trouble free installation:

1. Treat the unit with care

Do not disassemble the unit as you may damage the internal components. Dropping the unit or banging it against another object may cause the unit to malfunction.

2. Do not touch the internal components

Do not touch the internal components of the unit. There are no user serviceable parts inside.

3. Avoid contact with water

Install the unit where it can be kept dry. If the units gets wet accidentally, turn off the power and contact your dealer.

4. Install the unit away from possible sources of interference

Avoid running cables close to other wiring installations or electrical equipment, such as a TV. These may cause interference to video images. Relocate the cabling or find a new location.

5. Check the ambient temperature and humidity

Avoid using the camera in an area where the temperatures are outside the range specified. The quality of images may deteriorate and internal components may be affected.

6. Installation

1. Choose a suitable location to mount the phone/monitor. The handset should be mounted 1.50 to 1.70m from floor level.

2. Fix the mounting plate to the wall, using the screws supplied (see Fixing Holes Guide). Drill a hole in the centre of the mounting plate large enough to feed the cables through.

6

3. Connect the wires from the door entry camera to the connector on the back of the handset.

6. Installation (continued)

4. Attach the phone/monitor to the mounting plate by placing the handset over the four bracket hooks and sliding the unit down.

5. Insert the securing screw into the hole on the top of the mounting plate to secure the handset.

6. Connect the handset cord to the connector on the bottom of the handset and place the handset in the cradle to complete the installation.

7. Operation

Turn power switch ON, use the slide switches to adjust volume and brightness.

1. When the visitor presses the 'Call' button on the door entry camera, the monitor will sound a 'chime' tone to announce that a visitor is at the door. View the visitor on the screen and communicate with the visitor using the handset.

2. After communicating with the visitor you can press the 'Open' button to activate the door lock and open the door.

3. Press the 'Monitor' button to activate the door entry camera and monitor screen to view the picture from the camera. The image will remain on the screen for 90 seconds or until the handset is replaced.

4. Use the intercom function to ring other phone/monitors or intercom handsets.
