| Android Mobile Apps   |          |   |
|---|----------|---|
|  | NEYE Pro | <a href="https://play.google.com/store/apps/details?id=com.langtao.neyeprotwo&amp;hl=en_US">https://play.google.com/store/apps/details?id=com.langtao.neyeprotwo&amp;hl=en_US</a> |
|  | XVR Pro  | <a href="https://itunes.apple.com/us/app/xvr-pro/id1289616197?mt=8">https://itunes.apple.com/us/app/xvr-pro/id1289616197?mt=8</a>   |

Once the App is loaded please tap Local Login and then tap the three lines in a circle top left of the screen, tap Devices, tap the + in the top right of the screen and then either enter the GID code on the Live View Screen, tap Wifi Symbol on the GID entry and tap the discovered device or tap the QR Code and after it has opened your mobile device camera, scan the on-screen QR code (Main Menu > P2P Cloud)

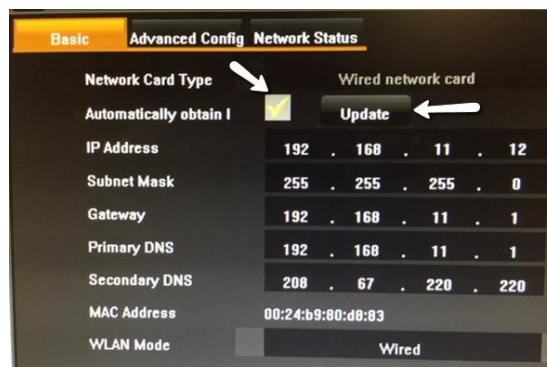

If you experience issues ensure the DVR is connected to the internet and confirm the P2P is active. You can see this on the Live View screen on the monitor after the date/time – ID: 8xxxxxxx P2P: ON –

In the event you do not see this enter the Main Menu and click P2P –

If you the DVR indicates that it has not connected to the internet / P2P server then please check the Network settings by going to Main Menu > Network Config –

It is recommended to ensure the Automatically obtain box is ticked to enable the DVR to communicate with your Internet/Broadband Router and obtain the correct information to open communications to the Internet.
